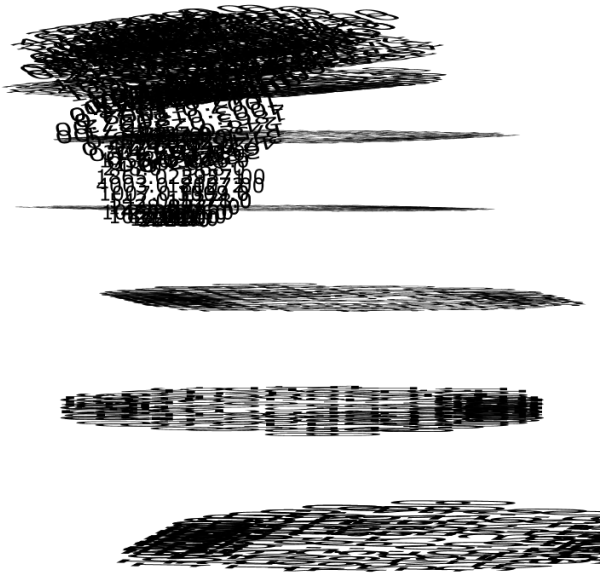
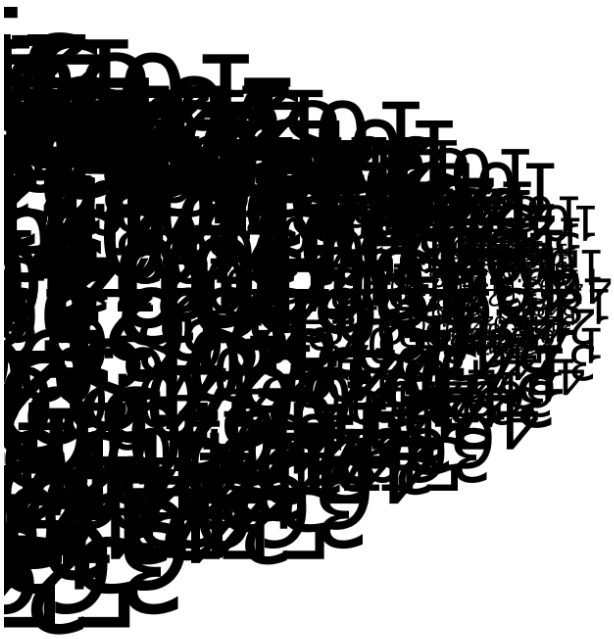
FRAGMENT

Processing:

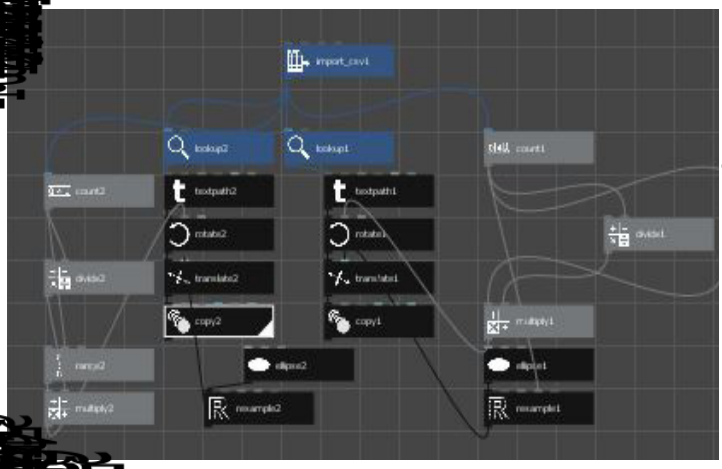
```
void setup() {
  size(480, 120);
}
void draw() {
  if (mousePressed) {
    fill(0);
  } else {
    fill(255);
  }
  ellipse(mouseX, mouseY, 80, 80);
}
```

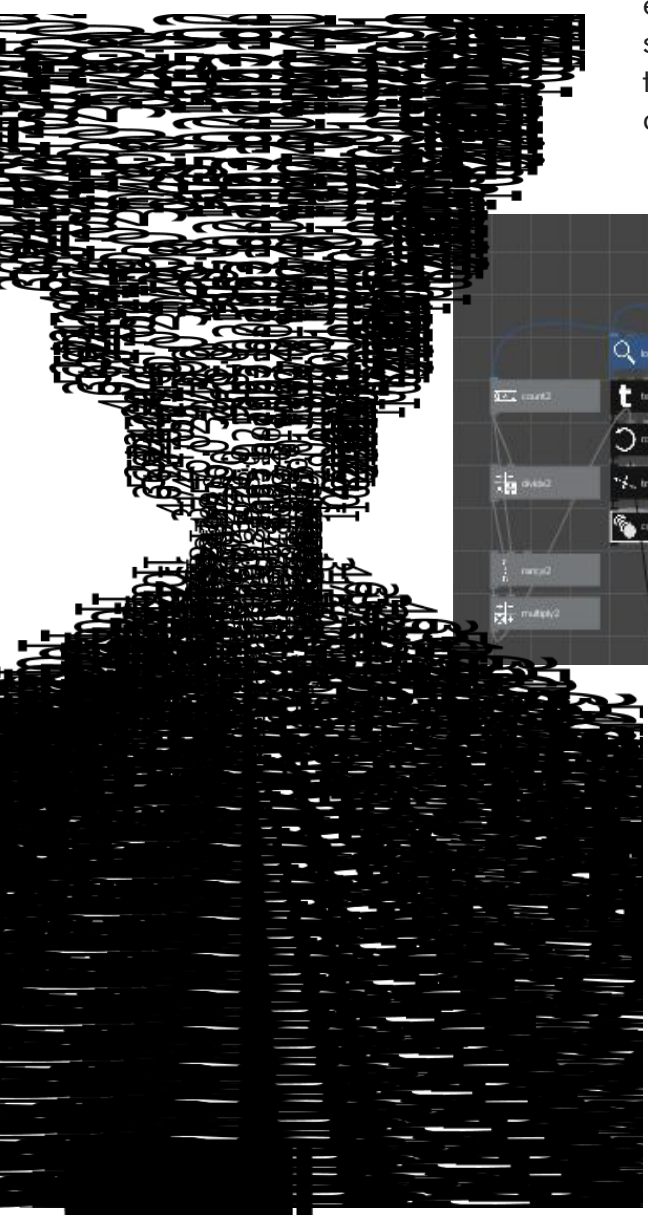


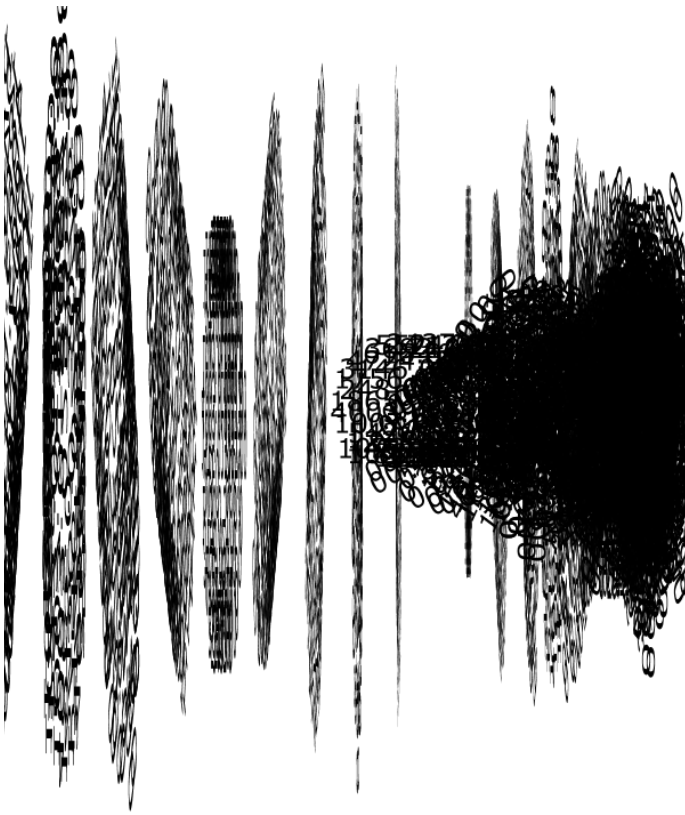


NodeBox

Ci-dessous le branchement à effectuer sur NodeBox, il suffit simplement de faire varier les options : Translate, Rotate, Scale afin d'obtenir différents résultats.







Gimp:

Utilisation de l'outil aérographaphe, opacité à 100%, afin d'obtenir les teintes plus foncées il faut repasser jusqu'à obtenir l'intensité désirée.
